## SUMMARY

Highly skilled Fire Engineer with background in designing, implementing and maintaining fire protection systems. Strengths lie in knowledge of fire safety regulations, risk analysis, and project management. Have successfully improved safety measures and reduced risks in previous roles. Possess strong problem-solving skills coupled with a keen ability to make critical decisions during emergencies.

## SKILLS

- Fire protection systems
- Hazard analysis
- Fire suppression systems
- Fire safety training
- Evacuation planning
- Accident Site Response
- Safety Equipment Inspection
- Fire Suppression Techniques
- Decision-Making
- Adaptability
- Written Communication
- Equipment Operation
- Apparatus maintenance
- Reliability

- Organizational Skills

supervisors.

- Performed regular maintenance checks on equipment and machinery in accordance with safety regulations.

### **Fire Fighting Technician Qatar**

- Performed troubleshooting and repair of equipment in accordance with manufacturer specifications.
- Tested and calibrated instruments to ensure accuracy and reliability of data.
- Maintained records of repairs, calibrations, and tests performed on equipment.
- Developed detailed reports documenting test results for analysis by engineers.
- Reviewed technical manuals and other documents related to product operation and maintenance requirements.
- Provided technical support services to customers via phone or email communication.
